Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 November 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Status of Claims

Claims 1-57 are currently pending in this application and are the subject of the Office action.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which lack unity of invention under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1-26, 45-53, drawn to a method of treating an individual who has cancer/inducing apoptosis in vivo in a cancer cell. If this Group is elected, then the below Summarized Species Election is also required.
- II. Claims 27-44, drawn to a method of inducing apoptosis in a cancer cell in vitro. If this Group is elected, then the below Summarized Species Election is also required.
- III. Claims 54-57, drawn to a method of identifying a compound with anticancer activity in vitro. If this Group is elected, then the below Summarized Species Election is also required.

The above inventions lack unity of invention under PCT Rule 13.1 in view of the fact that invention I is drawn to a method of treating an individual who has cancer/inducing apoptosis in vivo in a cancer cell, invention II drawn to a method of inducing apoptosis in a cancer cell in vitro and invention III drawn to a method of

Art Unit: 1614

identifying a compound with anticancer activity in vitro and as evidenced by Gribble et al. (US Patent 5,447,954). Thus, the requirement is proper as the inventions represented above as Groups I-III do not share a common inventive concept under PCT Rule 13.1.

Election of Species regarding Group I-III

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Specifically, applicant is required to elect a single disclosed species from each of the below items for examination purposes:

- 1) a single cancer/cell species e.g. glioblastoma; and
- 2) a single ATP citrase lyase inhibitor e.g. hydroxycitrate; and
- 3) a single tricarboxylate transporter inhibitor e.g. phosphoenolpyruvate.

Each cancer species represent distinct pathologic and clinical conditions. Also, each ATP citrase lyase inhibitor and each tricarboxylate transporter inhibitor represent different chemical entities which may reasonably exhibit varying or different pharmacologic and pharmaceutical properties. To the extent that these species lack the same or corresponding special features, they do not constitute a general inventive concept. Applicant is required to elect one single specie from each of the above items for examination purposes.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be

Art Unit: 1614

allowable. Currently, claims 1, 10, 16, 27, 28, 34, 42, 45, 52, 54 are considered generic to the above species.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Inventorship Notice

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charlesworth Rae whose telephone number is 571-272-6029. The examiner can normally be reached between 9 a.m. to 5:30 p.m. Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward, can be reached at 571-272-8373. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>.
